# **WEATHER OF CONCERN**

## **Weather of Concern**

- The dry trough will continue to move into the eastern portion of the Cascades, bringing increased winds that could be troublesome for firefighting efforts.
- Areas of smoke and haze will continue for portions of central California, especially near wildfires, affecting air quality.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

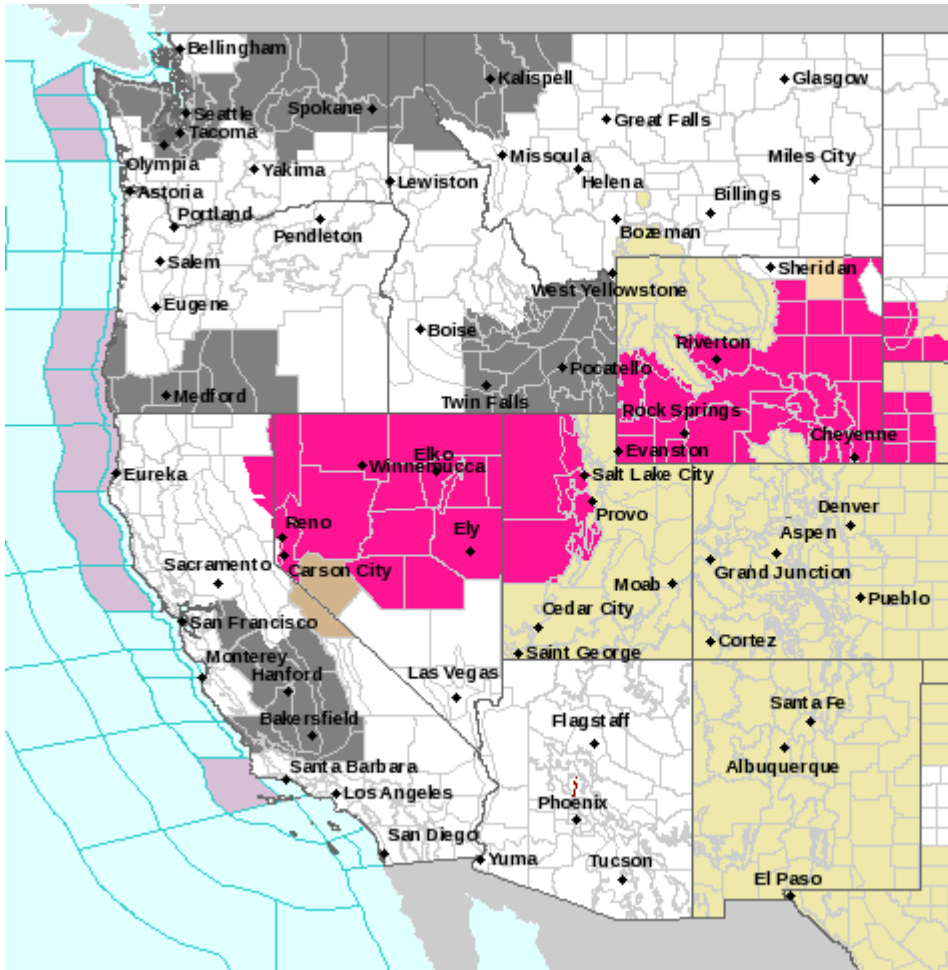

As the upper level trough continues to move south and east through the day, and a shortwave within the base of the trough will bring in a dry front. This will result in cooler temperatures, breezy winds, and some light rain. Firefighting efforts could be hampered by winds developing on the eastern portion of the Cascades. Near average temperatures will continue for early part of this week, however no precipitation is expected for the next week.

## **SOUTHERN CALIFORNIA**

An onshore flow through the night and morning will bring low clouds into the coastal areas and some valleys. This will produce brief gusty winds in the mountains and deserts during the afternoons and evening. Temperatures will remain near to slightly below normal through the end of the week, with low clouds and fog in the coastal and western valley areas during the nights and mornings.
